

Our Recipe for your success

We send you a questionnaire which helps us understand the space and resources you have available and likely equipment needs.

We will send you an outline proposal for the community café package which closest meets and next steps in helping you get your project up and running.

If you are confident your project is viable and you would like to have help from us, then one of our team will come and facilitate an interactive workshop with up to 12 people to take your project to the next stage. There is a fee for the workshop but no onward commitment.

After the workshop we expect you will have the confidence to go ahead, so if you want further help from us then we can provide you with a detailed proposal for everything you need to set-up and start your café project.

You now know all the resources and equipment you need to go ahead! After any refinement of the proposal we will produce a detailed agreement including finance plan for everything that will be supplied.

Once the agreement is signed we will start ordering your equipment. Once everything has been delivered to you we will schedule and deliver the training for your team at your premises.

Your community café is now ready to launch and the date will probably already have been set. We will provide on-site support for the launch if you have asked for that to be included in your package.

We will provide post-launch and ongoing support for as long as you have asked us to do so as part of your package,
